We thank you Yogesh Ji for attending the meeting and being a valued shareholder and we do appreciate your support.

With respect to the query raised, we would like to highlight that the valves is not finding much application in the renewable sector like wind energy and solar energy as the valves find application in the thermal sector and the Company does have supplied to the thermal sector, but it does not makes a significant contribution to the Company's turnover.

With respect to the renewable sector, the valves industry doesn't play an active role there. But, however if the Company does find any opportunity in future it will definitely try exploring it!

Thank you!
